

Research for the energy turnaround

January 15, 2015 | Andri Bryner

Topics: Ecosystems | Society

Mandated by the Federal Council, the Swiss National Science Foundation (SNSF) is launching two National Research Programmes (NRPs) to explore scientific and technological as well as social and economic aspects of implementing Energy Strategy 2050.

Coordinated energy research is a cornerstone of Energy Strategy 2050: it supports the substantial reduction of energy consumption, promotes new technologies and explores the social context. Eawag contributes in sub-projects and does also coordinated studies in the Programme [Energy-Change-Impact](#) with WSL.
