

ECHA Workshop in Helsinki

June 16, 2023 |

It was a great and a much welcomed idea by ECHA to organize the discussion platform on alternatives to animal testing for human and environmental health assessment from May 31 - June 1st, 2023, making sure that representatives of all stakeholder groups were involved.

Kristin Schirmer was invited to present about current status and next steps towards alternatives to chronic fish toxicity assessments, the only talk fully dedicated to environmental health.
